Subject: Support of representation

Categories:

Dear Tasmanian Planning Commission

I'm writing to provide my support for three representations made by the North East Bioregional Networks (NEBN) group.

1. I support the proposal for the NEBN Scenic Protection overlay being incorporated into the new Break O Day Planning Scheme as per the Scenic Protection Assessment-North East Tasmania report by Geoscene International. I also support the proposed Scenic Protection Areas and Management Objectives as listed in BRE Table C8.1 in the NEBN representation.
2. I support the NEBN Coastal Environment and Character Specific Area Plan (SAP) to reduce unsustainable development along our coastal zone – an area critical for conservation of endangered native species as well as outstanding natural beauty vital to the tourism industry.
3. I support the proposed NEBN Stormwater Specific Area Plan(SAP) as it aims to reduce the volume of stormwater leaving development sites as well as improve the quality leaving sites and entering waterways and wetlands thus reducing the impact of stormwater on wetlands and waterways as well as impacts on adjoining properties and infrastructure.

Regards
Dr Gary Luck PhD (Environmental Science)
