Subject: Gunns Rape of Tasmania

The blatant, undeniable devastation Gunns' is proposing of this RARE and UNIQUE wilderness must not be allowed.

Tasmania is part of a developed, educated and internationally important country. What hope do we have if the likes of Gunns' have their way when we know better? What do we have to live for if environments continue to be raped for money?

It is simply a disgusting inexcusable money making mission with no foresight..... and who would even dare mention the positiveness eco-tourism?
