To whom it may concern,

as a resident of the South Arm Peninsula, I am writing to express our communities complete disgust for the proposed Walker Corporation Development. There is no need for this destructive and unpopular development. There is plenty of real estate available in Tasmania and for that matter Australia wide.

I believe that this development will be both environmentally and visually destructive. This kind of development does not suit what we have to offer here in Tasmania. Tasmania has successfully marketed it self as a clean green State and this kind of development is both tacky and environmentally destructive. Time and time again the people of Tasmania have said no to this development, environmental studies have shown how destructive it will be. Lets be true to the democratic process and say no once and for all to this development.
