[REDACTED]

Dear Sir/Madam,

I checked the proposed zoning maps. I would like to draw your attention the area at the end of [REDACTED]  
[REDACTED] There is a number of residences there, and none of these small blocks currently have or are able to support any considerable agricultural use. These are, and have long-term been hobby farms and lifestyle blocks.

The current and future uses are likely to revolve around tourism and boutique/hobby farm produce, namely olives and truffles presently.

A recent agricultural report for PID 7832862 confirms negligible agricultural potential also.

Adjacent blocks in the same "pocket" of land are proposed to be Rural and I propose that the same zoning is applied to the small holdings at the end of [REDACTED]

Namely the blocks that have been long term residential and are unsuitable for commercial agriculture due to present use, size and topography are: PID 9706530, 7832862, 7146694, 7130588, 7446830, 7446830, 7446830.

Thank you

[REDACTED]
