Dear Gerald,

Re: Impact of Draft Latrobe Local Provisions Schedule – Tasmanian Planning Scheme

I write to you to submit a representation addressing the *Draft Latrobe Local Provisions Schedule – Tasmanian Planning Scheme (the Scheme)* impact on the Dulverton Waste Management (DWM) operations.

It is our understanding that the Scheme Attenuation Code affords DWM protection from conflicting development or land use in the vicinity of the DWM site. DWM seek to ensure that officers involved in assessing applications against the Scheme are aware of and appropriately apply the Attenuation Code.

It is the belief of DWM and our planning advisors that inclusion of an overlay outlining the Attenuation Distances applicable to DWM (via the LIST or GIS or similar), would simplify and strengthen the planning application assessment process.

Please do not hesitate to contact our office should you wish to discuss.

Thank you

Yours sincerely,

Mat Greskie
CEO
