Dear Janelle,

Thank you for your below feedback, response and enquiry.

Elizabeth's Letter:

Elizabeth's letter that was read at the Hearing differs from her Representation. Therefore I have included it here attached

It's hoped that when it's read again, further emphasis will be made that this writer knows the surrounding bushland, including Devonfield, more intimately and over a far greater length of time, than all of us who attended the Hearing.

Photos in Picture Book:

One of the Delegates requested to know which images were NOT taken on location within Devonfield bushland. However, I did not have opportunity to point these out prior to closure of the Hearing.

There are **four**: two at nearby nesting site to demonstrate that the Goshawks live within 500m of Devonfield, and two reference images used with permission to show animals otherwise not seen up close (NW burrowing crayfish and ultra close-up of Goshawk's face).

All others are taken on the Devonfield premises either from within or from a nearby vantage point, as indicated on the supplied handwritten guide.

Again, thank you for your ongoing guidance and support.

Kind regards,
Jennifer.
