You don't often get email from callyholthouse@hotmail.com. [Learn why this is important](#)

Dear Tas Planning

I am the co-owner of 2a Blue Gum Drive, Grassy, a property that falls within the attenuation zone.

I am concerned about the placement of the attenuation zone on the town of Grassy and by the extent of the zone and its impact on people who live in Grassy and around, and I would like the hearing to be held in Grassy.

The residents of Grassy will be disadvantaged by the attenuation zone as it will reduce their ability to use and enjoy their respective properties by limiting future use. This will also limit Grassy ability to grow larger as a town.

I support the mine, and believe this attenuation zone is something that should have been considered prior to the mine starting works. Given the mine is already operational I think this puts added pressure on Tas Planning to approve the attenuation zone which lacks some of the procedural fairness that it should have been afforded.

Thanks

Cally Holthouse
