Subject: Further Information Request - 3D Model of Stadium Project

Dear Anne,

The Commission requests the Corporation's current 3D model of the stadium , including any associated terrain or surface model of the surrounding area, for it to use as part of its integrated assessment. I understand that you discussed options for providing the model of the project with Commission staff in October 2024 and that there are a range of options to provide this in a form that is suitable for the Commission to use.

The Commission may provide the 3D model to specialist consultants to undertake a range of tasks associated with visualisation. The consultants will not use the model for any other purpose than that requested by the Commission.

Would you also provide any 'user notes' or other requirements that you believe are suitable. The Commission understands that the Revit / IFC is the preferred format for the model. However, there may be other solutions for providing the model in a suitable form.

Any advice and any outputs provided by the consultants will be reviewed by the Commission. It is possible that those outputs may be made publicly available, in which case that information will be provided to the Corporation as a matter of priority.

The Commission may also use the model data for preparation of visuals or running further analysis/visualisation in-house, where relevant.

The Commission would appreciate an early response to this request and any advice as to timeframes and any specific requirements that the Corporation may have, associated with this request.

Regards,

John
