Subject: draft guidelines for stadium

Categories:

I am writing to you to comment on the proposed guidelines

1. Your handling of this process over Christmas and New Year demonstrates its farcical nature
2. The guidelines suggest a future economic analysis to demonstrate the feasibility of a stadium on the site. Can we also request a more truthful analysis that will point out that it will cost more than proposed and in operating it will continue to lose money for decades to come.
3. The proposed stadium is a political exercise that will cost this State millions before ultimately the site will be sold cheaply to some wealthy enthusiast in the decades to come.
4. I trust the planning commission is working pro bono or you are part of the problem.

Thanks for the opportunity to comment
Regards

Chris
