The General Manager
Central Coast Council
PO Box 220
ULVERSTONE TAS 7315
admin@centralcoast.tas.gov.au

Peter Stronach
Lot 1(19A) Bannons Bridge Rd
Gunns Plains, 7315
PID: 2763693

To the Central Coast Council General Manager,

My property 2763693PID should be considered for inclusion under the Landscape Conservation Zone in the proposed State-wide Tasmanian Planning Scheme. This is to ensure that compatible use or development does not adversely impact on the protection, conservation and management of landscape values on this and surrounding properties.

This property has identifiable conservation values that include:

- bushland areas,
- large areas of native vegetation
- other areas of locally or regionally important native vegetation
- areas of important scenic values,
- threatened native vegetation communities,
- threatened species
- habitat and or refuge for threatened species
- important corridor habitat
- land that is recovering and is part of a larger conservation area
- links to existing reserves
- is under a covenant and Land for Wildlife agreement
- has natural areas that are stepping stones and/or refuge for wildlife
- river frontage or links to waterways and catchment services

Yours sincerely,

Signature
Peter Stronach

Please see attached Natural Values Report to support this change.

Natural Values Atlas Report

Authoritative, comprehensive information on Tasmania's natural values.

Reference: Stronach

Requested For: Peter Stronach

Report Type: Summary Report

Verified Species of biosecurity risk

No verified species of biosecurity risk found within 1000 metres

Unverified Species of biosecurity risk

No unverified species of biosecurity risk found within 1000 metres

Generic Biosecurity Guidelines

The level and type of hygiene protocols required will vary depending on the tenure, activity and land use of the area. In all cases adhere to the land manager's biosecurity (hygiene) protocols. As a minimum always Check / Clean / Dry (Disinfect) clothing and equipment before trips and between sites within a trip as needed <http://dpi.pwe.tas.gov.au/invasive-species/weeds/weed-hygiene/keeping-it-clean-a-tasmanian-field-hygiene-manual>

On Reserved land, the more remote, infrequently visited and undisturbed areas require tighter biosecurity measures.

In addition, where susceptible species and communities are known to occur, tighter biosecurity measures are required.

Apply controls relevant to the area / activity:

- Don't access sites infested with pathogen or weed species unless absolutely necessary. If it is necessary to visit, adopt high level hygiene protocols.
- Consider not accessing non-infested sites containing known susceptible species / communities. If it is necessary to visit, adopt high level hygiene protocols.
- Don't undertake activities that might spread pest / pathogen / weed species such as deliberately moving soil or water between areas.
- Modify / restrict activities to reduce the chance of spreading pest / pathogen / weed species e.g. avoid periods when weeds are seeding, avoid clothing/equipment that excessively collects soil and plant material e.g. Velcro, excessive tread on boots.
- Plan routes to visit clean (uninfested) sites prior to dirty (infested) sites. Do not travel through infested areas when moving between sites.
- Minimise the movement of soil, water, plant material and hitchhiking wildlife between areas by using the Check / Clean / Dry (Disinfect when drying is not possible) procedure for all clothing, footwear, equipment, hand tools and vehicles <http://dpi.pwe.tas.gov.au/invasive-species/weeds/weed-hygiene>
- Neoprene and netting can take 48 hours to dry, use non-porous gear wherever possible.
- Use walking track boot wash stations where available.
- Keep a hygiene kit in the vehicle that includes a scrubbing brush, boot pick, and disinfectant <http://dpi.pwe.tas.gov.au/invasive-species/weeds/weed-hygiene/keeping-it-clean-a-tasmanian-field-hygiene-manual>
- Dispose of all freshwater away from natural water bodies e.g. do not empty water into streams or ponds.
- Dispose of used disinfectant ideally in town through a treatment or septic system. Always keep disinfectant well away from natural water systems.
- Securely contain any high risk pest / pathogen / weed species that must be collected and moved e.g. biological samples.

Hygiene Infrastructure

No known hygiene infrastructure found within 1000 metres
