Dear TPC,

**Integrated Assessment for proposed Stadium at Macquarie Point**

I am concerned that the guidelines will be too narrow to address question such as:  
Do we need another stadium to cater to the small proportion of the population who support AFL and even smaller proportion who actually attend matches?  
Should the AFL be allowed to dictate what Tasmania has and where it will be, particularly given we had a fully developed and approved plan for Macquarie Point which had been widely accepted by the community?  
The lack of transparency and political interference in the process to date - will this now cease?

I have read and fully endorse the submission made by Our Place - Hobart.

In addition, the climate impacts need to be assessed. Concrete contributes 8% of CO2 emissions. This is a massive concrete construction, which would be built to encourage people to fly in and out Tasmania just to watch a match - is this truly responsible in terms of the climate crisis.

Yours faithfully,

Trudi Disney
