Subject: submission

I am writing relation to the property at [REDACTED] Howden with regards to your document DOC/26/36829

I am in favour of the Ireneinc report into the placing of my property into rural living category and opposed to the council recommendation of Landscape Conservation Zone

When purchased this property was in the rural residential zone and moved by the council into a conservation zone by the council without any consultation

This has had a devaluing affect on the value of the property

under this scheme it is near impossible to do anything with the land especially in relation to fire management as the council does not see this as a president

under the new scheme we will be able to clear properties as per Australian fire management standards without a council trying to stop you

under the new scheme people will have less council road blocks when trying to use or build on their land as is the current problem

Once again I am fully in favour of the Ireneinc report and pray that it will be implemented

A McLorinan
