Subject: DRAFT GUIDELINES - Macquarie Point Multipurpose Stadium Project of State Significance

I have read the draft guidelines for the above project and make the following suggestion:

To show true strategic intent there needs to be a clear pathway shown as to why this is the most appropriate site for the proposed development. A report should be requested which outlines the sites which were considered, the criteria used for site assessment, a matrix showing the weighting of each criteria for each site and a detailing of why this was the most appropriate site for the proposed development.

I feel this report would be best contained within the Social and Cultural section of the Guidelines.
