To Whom It May Concern,

Please find attached submission in response to the draft Local Provisions Schedule in relation to [REDACTED].

Kind regards

Tom and Sam Lamberton

TASMANIAN PLANNING COMMISSION

Kingborough Local Provisions Schedule — Direction 69 / Ireneinc Report

PART A — PROCEDURAL OPENING

To the Tasmanian Planning Commission,

I write in response to the letter dated 2 April 2026 (ref: DOC/26/36829) advising that the Ireneinc report recommends my property remains within the Landscape Conservation Zone (LCZ) under the draft Kingborough Local Provisions Schedule (LPS).

I did not make a formal representation during the public exhibition period and have not previously had correspondence with the Commission regarding the draft LPS. I understand that this letter has been sent to ensure procedural fairness and provides me with a clear opportunity to formally participate in this stage of the process. I understand that making a submission does not confer a right to be heard, but that the Commission may decide to invite me to discuss the matters raised.

I take up that opportunity and submit as follows.

PART B — PROPERTY DETAILS

Landowner name(s)	Thomas Joseph Lamberton & Samantha Katherine Bond
Property address	██████████, Margate
Title reference (folio)	245932/1
Lot size (approx.)	5 ha
Locality	Margate
Current IPS zone	Environmental Living Zone (ELZ)
Draft LPS exhibited zone	Landscape Conservation Zone (LCZ)
Ireneinc recommended zone	Landscape Conservation Zone (LCZ) — unchanged
Zone sought in this submission	Rural Living Zone (RLZ) — specify subcategory below

PART C — STATEMENT OF POSITION

I submit that the application of the Landscape Conservation Zone (LCZ) to my property is not consistent with the requirements of section 34 of the Land Use Planning and Approvals Act 1993 (LUPAA), the Section 8A Guideline No. 1 — Local Provisions Schedule: Zone and Code Application (the Zone Guidelines), or the Southern Tasmania Regional Land Use Strategy (STRLUS).

I request that the Commission determine that the Rural Living Zone (RLZ) is the appropriate zone for my property under the draft Kingborough LPS.

The specific subcategory I seek is:

- Rural Living Zone B (minimum lot size 2 ha) — reflecting the existing lot pattern in my locality

We live in a cul de sac where our neighbouring properties are all approximately 2 ha in size. We have been attempting to work through planning permission on this block for years, to no success based on council restrictions. Placing our property into this subcategory would provide consistency with neighbouring properties.

PART D — GROUNDS FOR THIS SUBMISSION

D1 — The LCZ does not comply with the Zone Guidelines (Guideline No. 1 / s.34 LUPAA)

The Commission is required by section 35L(2) of LUPAA to assess whether the LPS meets the LPS criteria, which includes compliance with the Zone Guidelines. The Commission confirmed at the Day 20 hearing that it will decide on the basis of the LPS criteria set out in section 34 of LUPAA and explicitly noted that Council's position — including its 16 March 2026 resolution favouring the 'least restrictive alternative' — is not binding on the Commission [Transcript, Day 20, 06:45:48]. I submit that the application of LCZ to my property does not comply with the Zone Guidelines as demonstrated below.

D1.1 — The Zone Guidelines prohibit LCZ where priority is residential (LCZ 4(a))

Zone Guideline LCZ 4(a) provides that the LCZ should NOT be applied to land where the priority is for residential use and development, instead indicating that the RLZ should be referred to. The Zone Guidelines further note explicitly that 'the LCZ is not a large lot residential zone, in areas characterised by native vegetation cover and other landscape values.'

My property has been used for residential purposes throughout the period it has been zoned Environmental Living Zone (ELZ) under the Kingborough Interim Planning Scheme 2015. Whilst the property has not been used for residential purposes to this date, this is not for a lack of trying. The intention upon purchasing this property years ago was to build for residential purposes. There was no evidence to suggest that there should be a primary use other than residential, given the location in a cul de sac amongst many other well established residential properties.

D1.2 — The LCZ is not a replacement zone for the ELZ (Zone Guidelines note)

The Zone Guidelines state expressly: 'The LCZ is not a replacement zone for the ELZ in interim planning schemes. There are key policy differences between the two zones.' The TPC itself noted this in its post-lodgement correspondence with Council, observing that the LCZ 'appears to have been used quite extensively to replace the ELZ' and that 'application of the LCZ could signify a shift in council policy or strategy, which generally ought to be comprehensively justified.'

No such comprehensive, site-specific justification has been provided for my property. The Ireneinc report applies the LCZ to my property on the basis of generalised locality-level landscape values, not on the basis of demonstrated landscape values specific to my title.

D1.3 — The RLZ is the appropriate zone under the Zone Guidelines (RLZ 1 and RLZ 2(b))

Zone Guideline RLZ 1(a) provides that the RLZ should be applied to residential areas with larger lots where the existing and intended use is a mix between residential and lower order rural activities, with priority given to the protection of residential amenity. This description accurately characterises my property.

Zone Guideline RLZ 2(b) further provides that the RLZ may be applied to land within the ELZ in an interim planning scheme where the primary strategic intention is for residential use and development within a rural setting and a similar minimum allowable lot size is being applied. My property satisfies both elements of this criterion.

My property has an area of approximately 5 ha, this is consistent with the RLZ minimum lot size of 2 ha which aligns with other neighbouring properties within Valley View Road.

D2 — The Ireneinc evaluation framework, applied correctly to my property, supports RLZ

The Ireneinc report applies an evaluation pathway (decision tree) to determine the appropriate zone. The Commission was told at Day 20 of the hearing that this framework is not a statutory instrument — it is a tool, not a rule [Kate Heckelmann, Transcript Day 20, 05:53:00]. Representations can depart from it with good evidence. However, I submit that even applying the framework as intended, my property satisfies the criteria for RLZ rather than LCZ.

D2.1 — My property has a strategic residential intention

The first decision point in the Ireneinc evaluation pathway asks whether there is a strategic intention for residential use. The report identifies visual evidence of existing residential use and known strategic intention as the relevant indicators. My property clearly satisfies this criterion.

There is currently no residential dwelling on our property, however we have been engaged with Council and have actioned numerous Contractors for engineering, drafting, natural resources assessments etc to the value of \$30,000 approximately, in the hopes that we could progress building on this property. This has not happened to this date.

D2.2 — My property has the characteristics of a rural living settlement

The Ireneinc framework identifies rural living settlement characteristics as: at least 10 smaller blocks generally ranging in size between 1–15 ha with a consistent lot pattern; a consistent pattern of detached dwellings with associated outbuildings; and visual evidence of rural activities (cleared areas, hobby farming, grazing etc.). The Ireneinc report's own locality baseline confirms that the broader settlement in which my property sits displays these characteristics.

My property is situated within a cluster of around 11 properties on [REDACTED], each with lot sizes approximately 2 ha. This pattern has been established for a number of years. Neighbouring properties contain detached dwellings with associated rural activities.

D2.3 — The identified landscape values can be managed outside of LCZ

The Ireneinc evaluation framework requires consideration of whether identified landscape values can be appropriately managed outside of LCZ, specifically through the Natural Assets Code (NAC), the Scenic Protection Code (SPC), or a Specific Area Plan (SAP). The Commission itself accepted this argument in relation to Kettering West at Day 20, where the panel effectively found that the Priority Vegetation Area (PVA) overlay does the landscape-protection work, not the zone [Transcript, Day 20, 02:33:54].

My property is not within a Scenic Protection Area (SPA). It is not subject to the NAC/PVA overlay. The property is predominantly vegetation as we have been unable to progress building on the land. Other properties neighbouring ours on [REDACTED] are environmental living with establishes residences on vegetated blocks. There is no native vegetation recorded on the title. My property is subject to the Scenic Landscape Code due to the top of the block containing ridgeline, and following all guidelines around building away from the ridgeline and boundaries, this would mean we would still be protecting the ridgeline.

D2.4 — The RLZ subcategory provides for limited or no further subdivision

The Ireneinc framework identifies as a key RLZ suitability indicator that the transition 'would result in limited/no further subdivision' and that 'a similar minimum allowable lot size is being applied.' Applying RLZ [A/B/C/D] to my property achieves this outcome, as the minimum lot size under that subcategory is consistent with the existing lot size and does not create a viable subdivision pathway.

My property has an area of around 5 ha. Under RLZ B, we would have significantly constrained ability to subdivide under this category. RLZ B also aligns clearly with other properties within the cul de sac.

D3 — The TPC panel's own statements support RLZ for properties like mine

The following exchanges from the Day 19 and Day 20 TPC hearings directly support the argument that the RLZ is more appropriate than the LCZ for my property. These statements were made by TPC Commissioners and are on the public record.

D3.1 — The evaluation framework is not a statutory instrument

Kate Heckelmann (Ireneinc) conceded at Day 20 [05:53:00] that the evaluation framework is not a statutory instrument — it is a tool, not a rule. The Commission is not bound by its application in any individual case and must assess my property against the statutory criteria in section 34 of LUPAA and the Zone Guidelines.

D3.3 — Visible rural activity is not required for RLZ

The TPC panel confirmed at Day 20 that visible rural activity is not a prerequisite for RLZ. This was applied consistently across multiple localities including Howden, Albion Heights, and Kingston West [Day 20 guide]. Properties need not demonstrate active farming or grazing to satisfy the RLZ criteria — residential use in a rural setting is sufficient.

D3.4 — Analogy to accepted RLZ localities

The Ireneinc report recommended full ELZ to RLZ transitions for a number of localities, including Kettering East and Oyster Cove, Howden and Blackmans Bay, Albion Heights, and Tinderbox West. No questions were asked about these recommendations at the hearing, though this does not indicate acceptance by the Commission. The characteristics of those localities — established residential settlement, lots generally between 1 and 15 ha, mixed residential and rural activities, limited evidence of significant landscape values requiring LCZ protection — are shared by my property.

My property in Margate is directly comparable to properties in Oyster Cove, Kettering and Howden where RLZ was recommended. These areas share the following characteristics: lot sizes, proximity to existing RLZ, absence of significant landscape values and settlement pattern. There is no principled basis on which to treat my property differently.

D4 — Consistency and fragmentation arguments

D4.1 — Fragmented LCZ application should be resolved in favour of the surrounding zone

The Ireneinc report itself identifies avoidance of fragmented LCZ application as a key principle. The report notes that areas where only 2–3 LCZ-zoned properties are surrounded by Rural Zone (RZ) or RLZ land should be modified to resolve the fragmentation. Where my property is located within or adjacent to an area predominantly zoned RLZ or RZ, the application of LCZ creates exactly the kind of spot-zoning that the Ireneinc framework seeks to avoid.

Some of the neighbouring properties outside of [REDACTED] are proposed to be RLZ. By zoning our property LCZ this will create a fragmented and isolated pocket of LCZ. There are properties located on Van Morey Road and Old Bernies Road that are within the surrounding zone and listed as being evident patterns of residential use with minimal cleared area.

D4.2 — Inconsistency with adjoining or comparable properties

The Zone Guidelines require that the spatial application of zones be, as far as practicable, consistent with and coordinated across the LPS. Where neighbouring properties with substantially similar characteristics have been recommended for RLZ, the application of LCZ to my property is inconsistent and not supported by evidence of any material difference.

Some of the neighbouring properties outside of [REDACTED] are proposed to be RLZ. By zoning our property LCZ this will create a fragmented and isolated pocket of LCZ.

D5 — Council's approach has been historically inconsistent

The Ireneinc LCZ Review report documents a significant evolution — and inconsistency — in Council's approach to the application of the LCZ to ELZ land. At the time the draft LPS was first submitted to the TPC in 2020, approximately 85% of ELZ parcels were proposed for LCZ. The TPC noted that this approach was often inconsistent with the Zone Guidelines and that 'often when assessing particular sites the zone proposed does not seem to match these criteria or those of Guideline No.1.' By the time of public exhibition the proportion had been reduced to approximately 75%, with the balance transitioning to RLZ, RZ, and other zones.

This history demonstrates that the initial presumption in favour of LCZ was not well-founded and that the LCZ application has been progressively narrowed as the evidence base has been tested. The Ireneinc report represents a further iteration of this process, but where the evidence specific to my property supports RLZ, the LCZ recommendation should not be allowed to stand.

D6 — Any landscape values present can be managed without LCZ

Where landscape values are present on or near my property, I submit that they can be appropriately managed through the application of the relevant overlay controls, without the need for LCZ. The TPC panel acknowledged on Day 20 [02:33:54] that the PVA overlay and SPC do the landscape-protection work in many cases, removing the justification for LCZ in those areas.

Ireneinc itself acknowledged in the LCZ Review report that a future rural living settlement review may reconsider current RLZ decisions, and that any short-term risk is 'not something that's a definitive or a risk that can't be mitigated with future action' [Transcript, 03:06:18]. This acknowledgement of residual risk mitigation further supports the appropriateness of RLZ rather than LCZ for my property.

My property is subject to the Scenic Landscape Code due to the top of the block containing ridgeline, and following all guidelines around building away from the ridgeline and boundaries, this would mean we would still be protecting the ridgeline. The combined effect of RLZ zoning and these overlay controls is sufficient to manage any landscape code identified in the locality baseline without resorting to LCZ.

D7 — Inconsistency in the Ireneinc evaluation framework (Attachment A)

A formal inconsistency analysis has been prepared and is attached to this submission as Attachment A. That analysis compares the landscape value descriptions, settlement characteristics, lot sizes, SPA coverage, PVA/NAC overlay coverage, and risk ratings applied by Ireneinc to this locality against one or more similar localities that received a more favourable zone outcome using the same or near-identical evidence.

The analysis draws on the following key statements from the Day 20 TPC hearing:

- Commissioner Rohan Probert [01:07:48]: Directly identified that landscape descriptions for Tinderbox East and Howden are near-identical yet produced opposite zone outcomes, asking Ireneinc to identify the actual difference between those two. This principle applies to the inconsistency documented in Attachment A for this locality.
- Commissioner Dan Ford [02:33:54]: Forced the concession that the PVA overlay does the landscape-protection work, not the zone. This principle applies where PVA overlay is present on my property.
- Kate Heckelmann (Ireneinc) [05:53:00]: The evaluation framework is a tool, not a statutory instrument. Submissions can depart from it with good evidence.

As documented in Attachment A — Margate, the comparison with Margate shows that Ireneinc applied near-identical landscape value descriptions and settlement findings to both localities yet recommended [LCZ] for my block and [RLZ] for similar locality. The sole differentiator cited — Elevation— does not apply to my individual property because the majority of my block is below visibility for any public area or even limited impact to any private property and given the positioning of our top boundary will not impact the ridge line at all.

I request that the Commission have regard to Attachment A in assessing this submission, and in particular to the specific comparison rows identified above, which demonstrate that the Ireneinc recommendation for this locality is inconsistent with the outcome produced by the same evaluation framework applied to comparable localities elsewhere in the municipality.

PART E — LOCALITY-SPECIFIC CONTEXT

- Van Morey Road differentiation: My block runs from the close to the bottom of the hill side up towards the ridge line. However the boundary line is just below the ridgeline all ready with no tree's that impact the line itself positioned on the top of our block, they all fall over the boundary. Given the positioning of the boundary, following normal rules around being offset there would be no impact to the ridge line and therefor would be unreasonable and unjust to apply LCZ to our block for this reason.
- Many representations from Margate opposed LCZ — I note the breadth of community opposition as evidence of unreasonable impact: we have already spent tens of thousands of dollars to try and build our dream home on our land, given the current state of the council and unreasonable hurdles this has been an impossible task for the average Australian. I also add the unreasonable impact of being required to continue to pay our rates for a block we have been unreasonably restricted from use.

PART F — CONCLUSION AND RELIEF SOUGHT

For the reasons set out above, I submit that:

1. The application of the LCZ to my property is inconsistent with the Zone Guidelines (Guideline No. 1) and does not satisfy the requirements of section 34 of LUPAA.
2. The LCZ is prohibited by Zone Guideline LCZ 4(a) where, as here, the priority of the land is residential use.
3. The Rural Living Zone satisfies the criteria in Zone Guidelines RLZ 1(a) and RLZ 2(b) and is the appropriate zone for my property.
4. Any landscape values identified in the locality can be appropriately managed through existing overlay controls without resort to LCZ.

I respectfully request that the Commission:

- Determine that the draft Kingborough LPS should be modified to include my property within the Rural Living Zone [specify subcategory A/B/C/D];
- If the Commission proposes any alternative outcome, that I be provided with an opportunity to respond before any final determination is made.

I request that the folio of the Register 245932/1 at [REDACTED], Margate, be included within the Rural Living Zone (C) in the Kingborough Local Provisions Schedule.

PART G — ACRONYMS / TERMS USED IN THIS SUBMISSION

Acronym/Term	Meaning
ELZ	Environmental Living Zone
Ireneinc report	Review of the LCZ Kingborough (Review of the Methodology and Zone Application and Locality Baseline and Alternative Zone Evaluation)
LCZ	Landscape Conservation Zone
LPS	Draft Kingborough Local Provisions Schedule
LUPAA	Land Use Planning and Approvals Act 1993
NAC	Natural Assets Code
PVA	Priority Vegetation Area
RLZ	Rural Living Zone
SAP	Specific Area Plan
SPA	Scenic Protection Area
SPC	Scenic Protection Code
STRLUS	Southern Tasmania Regional Land Use Strategy
TPC	Tasmanian Planning Commission
Zone Guidelines	Guideline No. 1 — Local Provisions Schedule: Zone and Code Application

ATTACHMENT A

Inconsistency Analysis — Ireneinc Zone Evaluation

PART 1 — SUBMISSION IDENTIFICATION

Submission reference	<i>Thomas Joseph Lamberton & Samantha Katherine Bond — [REDACTED] [REDACTED] — Direction 69</i>
Property title reference	<i>245932/1</i>
Locality	<i>Margate</i>
Submission template used	<i>T1 — Contest LCZ, seek RLZ</i>
Date of attachment preparation	<i>03/05/26</i>

PART 2 — PURPOSE OF THIS ATTACHMENT

This attachment has been prepared to support the written submission identified above. It provides comparative analysis of the Ireneinc zone evaluation framework as applied to the landowner's locality, compared against one or more similar localities that received a different — and more favourable — zone outcome using the same or very similar evidence.

The purpose is to demonstrate to the Commission that the Ireneinc recommendation for this locality is inconsistent with the outcome produced by the same evaluation framework applied elsewhere in the municipality, and that there is no clear reason to treat this locality differently from the similar localities identified.

This attachment should be read alongside the written submission, in particular the arguments set out in Part D (D7 — Inconsistency in the Ireneinc evaluation framework) and Part E (Locality-Specific Context) of that submission.

PART 3 — HEARING EVIDENCE SUPPORTING THIS ANALYSIS

The following statements from the Day 19 and Day 20 TPC hearings directly support the use of a comparative inconsistency analysis as evidence in a submission:

Speaker and timestamp	Statement and relevance
Delegate Rohan Probert [01:07:48]	Comparing Tinderbox East (LCZ) with Howden (RLZ): 'They are very similar if you only look at the description of the landscape values... one we say they can be managed and the other one we say they can't be managed. What we really need to say is the difference between those two.' This statement acknowledges that the Ireneinc framework produced inconsistent outcomes from very similar evidence, and that the difference between localities needs to be clearly explained. This analysis does exactly that for this locality.
Delegate Dan Ford [02:33:54]	At Kettering West: effectively forced the concession that the Priority Vegetation Area (PVA) overlay does the landscape-protection work, not the zone. This is directly relevant where PVA applies to the subject property and LCZ has been recommended — the same logic that produced RLZ at Kettering West Groombridges applies.

Kate Heckelmann (Ireneinc) [05:53:00]	Conceded that the evaluation framework is a tool, not a legal requirement. Submissions can move away from it if supported by good evidence. This confirms that identifying inconsistencies in the framework's application — as this analysis does — is a legitimate basis for a submission.
Chair Nick Heath [06:45:48]	Confirmed that the Commission will decide on the basis of section 34 LUPAA criteria (Zone Guidelines and LPS criteria), not on the basis of Council's position or the Ireneinc framework alone. The Zone Guidelines require consistent application of zone criteria — inconsistency of the kind documented in this attachment is therefore directly relevant to the Commission's assessment under the law.

PART 4 — MOST RELEVANT COMPARISONS FOR THIS SUBMISSION

The following table identifies the specific comparisons within the attached Inconsistency Analysis that are most directly relevant to this submission. The full comparative tables for this locality appear in the pages that follow.

Characteristic compared	Similar locality cited in Attachment A	Why this comparison supports my submission
Ireneinc landscape value description	Van Morey Road: 'significant natural landscape values and scenic landscape values'; elevated; SPA-covered; prominent views from Channel	RLZ cluster: 'landscape values consistent with that anticipated in a rural living settlement; contributing to overall scenic character' — landscape values PRESENT but found manageable
Settlement characteristics found	Limited — Van Morey Road has fewer residential lots; not a clear rural living settlement pattern	Yes — recognisable rural residential subdivision pattern; lots 2–7 ha; residential uses and rural activities
Lot sizes	Larger lots on Van Morey Road; less consistent pattern	2–7 ha — consistent with RLZ C
SPA coverage	YES — significant SPA coverage on Van Morey Road elevated area	Partial — same general area
PVA / NAC overlay	Yes	Yes
Risk rating applied	High (Van Morey elevated block)	Low-medium
DP6 — codes manage landscape values?	NO — SPA coverage does not negate the elevated prominence and visual significance at this specific location	YES — codes and min lot size manage values; consistent with adjoining RLZ land
Key differentiator cited	Elevation, SPA coverage, visual prominence from Channel; no clear rural living settlement pattern	Settlement pattern consistent with rural living; existing blocks already fully used

PART 5 — PROPERTY-SPECIFIC DIFFERENTIATION

This attachment identifies inconsistencies at the locality level. The submission itself provides the property-specific evidence explaining why those inconsistencies apply to this individual property. In summary, the following characteristics of this property are consistent with the similar localities that received RLZ, and are not consistent with the reasons cited by Ireneinc for LCZ retention:

My lot is 5.8 ha — consistent with the 1–5 ha range accepted for RLZ at Howden, and within the range for which Ireneinc found codes manage landscape values adequately. My lot does display the elevated vegetated ridgeline character cited as the basis for LCZ retention, however the top boundary of my lot is just below the ridge line and following all regular boundary requirements would result in no impact to the ridge line, protecting that visually. The remainder of my block is not visibly impacting any public area.

PART 6 — VERIFICATION AND PRIMARY SOURCES

All comparisons in this attachment can be verified against the following primary source documents, which are publicly available:

- Ireneinc Locality Baseline and Alternative Zone Evaluation (available on the TPC website)
- Ireneinc LCZ Review and Findings Report (available on the TPC website)
- TPC Day 20 hearing recording — Kingborough Council YouTube channel (available until midnight 19 June 2026)
- Section 8A Guideline No. 1 — LPS Zone and Code Application (available on the TPC website)

PART 7 — DECLARATION

I confirm that:

1. This attachment has been prepared to support a formal written submission to the Tasmanian Planning Commission in relation to the Kingborough Local Provisions Schedule (Direction 69).
2. The comparisons contained in this attachment are based on publicly available Ireneinc reports and TPC hearing records, and I have made reasonable efforts to ensure accuracy.
3. I am the owner or authorised representative of the property identified in Part 1 above.
