Dear Tasmanian Planning Commission

My husband and I bought our property 28 years ago with our young family and we have enjoyed living here under the Rural Living zone. We have been able to give our children and now our grandchildren a rural lifestyle complete either animals, growing fresh produce whilst respecting and regeneration our natural environment.

We were notified by our neighbours last year about the proposed changes by Kingborough Council to change our zone from Rural Living Zone to Conservation Living Zone, we had been away visiting our daughter in Queensland when the proposed changes were announced by Kingborough Council and missed the deadline to make a submission.

We subsequently wrote to Kingborough Council and Tasmanian Planning Commission with our objection to the change and for Kingborough Council to contact us by mail or email for any further updates as we don't go into council office or read Kingborough Cronicle for information.

We support the Ireneinc report that recommends that our property be included within the Rural Living Zone, therefore returning our property zone back to what it was when we purchased it.

Kind Regards
Suzanne & Phil Douglas
