[Young regrowth.ipq](#)

Hello,

Please find attached supplementary documents my husband and I would like the Panel to have available to them prior to our 2nd hearing scheduled for the 27th of this month.

Attached you will find a certified Forest Practice Plan for our property; this stipulates an approved area of 11.0ha to be cleared on "Lot 2" (total 19.9Ha, see attached 'Folio plan'). This is in addition to the 1ha/100ton clearing allowable per annum without permit. Please note marked Wildlife Habitat Clumps and Biodiversity Protection Zones have been addressed. Remaining flora on 'Lot 2' is protected, thus left to minimise environmental impact. We cannot see further gain in changing the zone on this title from RU2 to LCZ.

It has also been noted throughout the property that there is evidence of historic farming and logging. Numerous fence posts, cow skeletons, young regrowth and logging tracks have been identified (See attached photos; 'Fence' & 'Young regrowth').

Also attached is our PIC registration certificate for our current address, for the running of livestock and the planning of orchids.

We would also like The Board to be made aware that we have a shed application in the final stages of approval with the HVC for Lot 2 on our property.

If you require any further information, please let me know.

Kind regards,

Michelle and Daniel Becker

OWNER FOLIO REFERENCE 203733/1 GRANTEE	PLAN OF TITLE LOCATION BUCKINGHAM - CHAMP FIRST SURVEY PLAN No. COMPILED BY LDRB SCALE 1: 8000 LENGTHS IN METRES	Registered Number P.142648 APPROVED 22 NOV 2004 <i>Alice Kawa</i> Recorder of Titles	
MAPSHEET MUNICIPAL CODE No. 115 (5022)	LAST UPI No FPL79	LAST PLAN No. P203733	ALL EXISTING SURVEY NUMBERS TO BE CROSS REFERENCED ON THIS PLAN

We, **Daniel Andreas BECKER and Michelle Louise BECKER** confirm that the Folio Plan highlighted correctly identifies the property that we are purchasing. We confirm that the boundaries are as per the Folio Plan and advise that we do not require a Land Survey to verify the boundaries.

Forest Practices Act 1985		Forest Practices Plan		FPP No.: AKO0407-01
Certification Number: 2023-0278		Local File ID: -		
Update Type: Initial	Last edit by: AKO - O'Malley A K	Created on: 29/05/2023	Updated on: 13/07/2023	

It is necessary to read this Forest Practices Plan in its entirety for the specifications required by Section 18(2) of the Forest Practices Act 1985. This Forest Practices Plan authorises forest practices and operations to which it refers on the land specified in the Plan and during the period specified in the Plan, provided that the operations are carried out in accordance with the Plan.

This authority is given for the purposes of the Forest Practices Act 1985 only. Those carrying out the operations under the Plan should ensure that they comply with all relevant laws including the conditions of licences, permits and other authorities issued under other laws.

		Total Area of Operation: 16.00

AKO 13-7-2023

A. GENERAL

- Forest practices will be conducted in accordance with the *Forest Practices Code*. All relevant *Forest Practices Code* mandatory statements ('will' statements) apply, whether or not they are referred to below. The specific requirements set out below also apply.
- All contractors are required to have a copy of this Forest Practices Plan and any subsequent variations on site when forest operations are occurring.
- Operations will not commence until contractors have been briefed on site by a Forest Practices Officer.
- All boundaries marked on the FPP map are pictorial representations only and may not have been plotted with absolute accuracy. Features such as roads, landings, streamside reserves, stream crossings and coupe boundaries have been located on the ground.
- All forest operations are to comply with the Fire Service (Miscellaneous) Regulations 2017 Regulation 8 in relation to fire fighting equipment on site. Fire weather monitoring and shutdown procedures for all hazardous forest activities during a Fire Permit Period should be adhered to as per the annually updated Forest Industry Protocols. Hazardous forest activities are defined as any work involving chainsaws, cable machinery, vehicles or tools that come into contact or are close to forest fuels.
- **All machinery is to be washed down prior to entering and leaving the coupe.** The **landowner** is to be given the opportunity to inspect the machinery with at least 24 hours notice. Machinery washdown protocols are as per the "Tasmanian Washdown Guidelines for Weed and Disease Control".
- **Marking of boundaries:**
 - Prior to operations commencing the marking of boundaries will be completed as prescribed by a person who is sufficiently competent to mark the boundaries in accordance prescriptions contained in this forest practices plan.
 - The timing of the boundary marking will be sufficient to allow compliance by operational staff as and when they are operating in different sections of this forest practices plan. That is the taping of boundaries should be recent enough for the boundary to be clearly identifiable at the time of operations occurring in each section.
 - If geolocation of boundaries is to be relied upon during operations, tree-fallers and machine operators should exercise care when GPS equipment shows they are within 50 metres of any boundary and validate the boundary location by physical inspection before proceeding. If the aforementioned person is in doubt as to the boundary location, a FPO or competent person should mark the boundary with tape in accordance with the prescriptions contained in this forest practices plan.
- Common abbreviations used in this Forest Practices Plan:
 - FPO: Forest Practices Officer
 - FPP: Forest Practices Plan
 - MEZ: Machine Exclusion Zone
 - SSR: Streamside Reserve
- This plan covers the clearfelling of approximately 11 ha of native forest. Following harvest the area will remain cleared.

B. BUILDING ACCESS TO THE FOREST (ROADING) AND MAINTENANCE

(See also section D. Conservation of Natural and Cultural Values and section F. Management of Fuels, Oils, Rubbish and Emissions)

		Initial	Date
FPP No:	Landowner(s) or authorised representative	MB	11/07/23
AKO0407	Applicant	DB	11/07/23
	FPO (Planning)		11/07/23

General

- This section must be read in conjunction with Section D. “**Conservation of Natural and Cultural Values**” and Section F. “**Management of Fuels, Oils, Rubbish and Emissions**”.
- No road construction required. Access will be via existing roads.
- Access tracks can be used for carting providing they are effectively drained during use and are used for carting in dry conditions only. General location of existing and proposed access tracks are shown on the FPP map.

C. HARVESTING TIMBER OR CLEARING OF TREES

(See also section D. Conservation of Natural and Cultural Values and section F. Management of Fuels, Oils, Rubbish and Emissions.)

Person or organisation assuming primary responsibility for management of forest practices under this section of the plan **Daniel Becker**

General

- This section must be read in conjunction with Section D. “**Conservation of Natural and Cultural Values**” and Section F. “**Management of Fuels, Oils, Rubbish and Emissions**”.
- Access will be from **Grandmere Road** and associated access track.
- It is the responsibility of the contractor to cease carting on wet roads prior to exceeding the wet weather limitations specified in the current Forest Practices Code.
- Access tracks can be used for carting providing they are effectively drained during use (e.g. via spoon drains or outslipping) and are used for carting during dry conditions only. General location of existing and proposed access tracks are shown on the FPP map.
- Harvest boundaries will be marked with BLUE flagging tape. Where the harvest boundary is clearly defined by an access track or firebreak, then marking with tape may be omitted.
- Property boundaries will be marked with PINK flagging tape.
- Harvesting will be carried out in a systematic manner to allow restoration to be completed as work progresses.

Silvicultural treatment (see Forest Practices Code C1.1)

- Clearfelling.

Harvesting and extraction equipment

- The type of harvesting and extraction equipment should meet the following standards:

Soil Status	Dry – Moist	Wet
Equipment Type	A	A

Felling

- A fully integrated mechanised/manual clear felling.

FPP No:	Landowner(s) or authorised representative	Initial	Date
		<u>MB</u>	<u>11/07/23</u>
AKO0407	Applicant	<u>DB</u>	<u>11/07/23</u>
	FPO (Planning)	<u></u>	<u>11/07/23</u>

- No trees are to be felled over boundaries identified in this FPP unless authorised by a **Forest Practices Officer** for safety reasons. If a tree accidentally falls over a boundary, a **Forest Practices Officer** must be notified immediately and they will make a decision as to whether the tree will be pulled out or left in place.
- Trees to be felled away from all reserves (i.e. streams etc.) where possible. If unavoidably felled into such reserves, then the heads are to be pulled completely clear.
- No logging debris is to be left within 5 metres of any harvesting boundary.
- Cull trees are to be felled where safe and practicable to do so.

Wet weather limitations

- It is the responsibility of the harvesting contractor to cease log extraction prior to exceeding the wet weather limitations specified in the current Forest Practices Code.

Extraction tracks (including management and restoration)

- General extraction direction is indicated on the FPP map.
- Extraction tracks will not be established along drainage depressions.
- If rutting of extraction tracks is approaching a depth of 300 mm or more over a 20 metre length, then the track will be corded. Slash matting should be used where rutting is likely to occur.
- No more than 3 main extraction tracks should be open at any one time unless approved by the **landowner**. Other tracks will be drained progressively.
- Extraction tracks should be temporarily gripped prior to extended shutdowns of one (1) week or more.
- Extraction tracks will avoid drainage depressions and saturated soils as much as possible. If rutting occurs the extraction routes are to be adequately corded and matted or machinery is not to traverse the area until soils have dried out and traffic can pass without causing ruts.
- Where drainage depressions are present, extraction tracks will proceed from drainage depressions onto higher ground as soon as possible to avoid damaging soils in the drainage depressions and causing alterations to the natural flow of water.
- Main extraction tracks should be corded or matted during construction in wet areas and temporary culverts used to reduce soil degradation and maintain trafficability and water quality.
- Also see provisions under Streamside Management and Section D of this plan.

Landings and stockpiles (including management and restoration)

- There are **three** landings, approximately located as per the attached map.
- Landings will be located:
 - ➔ on well drained sites preferably on gently sloping elevated areas.
 - ➔ so that mud and slush from the landing does not enter watercourses.
 - ➔ as far as practical away from watercourses and not within 40 m of any streamside reserves or machinery exclusion zone.
- Landings should be kept as small as practicable and will not exceed 0.2 ha (40 m x 50 m) in area without prior approval from a Forest Practices Officer. Any such authorisation will be noted on file.
- Additional landings may be constructed with prior approval of a Forest Practices Officer who will mark the location of any such additional landings in the field. Any such additional landings will be noted on file with the original Plan.

		Initial	Date
FPP No:	Landowner(s) or authorised representative	<u>MB</u>	<u>11/07/23</u>
AKO0407	Applicant	<u>DB</u>	<u>11/07/23</u>
	FPO (Planning)	<u></u>	<u>11/07/23.</u>

- Management of fuels and lubricants on the landing will be as per Section F of this plan.

Streamside management and special water quality protection measures

- Two class 4 streams exist within the FPP.
- The Class 4 streams are embedded within the "Biodiversity Protection Zone and a Wildlife Habitat Clump.
- Reserves to be marked in BLUE tape. No trees are to be felled into or out of reserves.
- If any unmapped streams are encountered, then work will cease in the vicinity of that stream and a Forest Practices Officer consulted. Work may proceed in the vicinity once the FPO has provided advice on classification and treatment of that stream.
- Drainage depressions are not mapped but their general location is indicated on the FPP map. They are characterised by flat ground often covered with (rushes/cutting grass etc) and when wet the soils are weak and prone to rutting, especially where loaded forwarders or multiple passes of machinery is involved.
- Sites for refuelling will be located at least 40 metres from any watercourse to avoid any contamination due to a spillage.

Streamside reserve and harvesting boundaries to be marked by:

Person or organisation nominated **Daniel Becker**

How marked:

Harvesting/Operational Boundary :	Blue Flagging Tape
Property Boundary :	Pink Flagging Tape
Reserves :	Blue Flagging Tape
Machine Exclusion Zones :	Blue and White Flagging tape

N.B The person(s) nominated to mark or geolocate boundaries must be able to demonstrate that they have sufficient competence to do the location and/or marking.

Post harvesting restoration

- Restoration is to be carried out progressively as areas are completed.
- No substantial harvesting debris is to be left within 5 m of any harvesting boundary.
- At least one piece of harvesting machinery that is capable of completing restoration work will be left onsite until a formal clearance has been given from the **landowner**.
- Tracks will be gripped progressively as areas are completed. Grips will be spaced as per Table 5 (**Maximum Spacing Between Grips on Extraction Tracks**), of the current Forest Practices Code, for **moderate** erodibility class soils.

Fire management planning

General

		Initial	Date
FPP No:	Landowner(s) or authorised representative	MB	11/07/23
AKO0407	Applicant	DB	11/07/23
	FPO (Planning)	<i>[Signature]</i>	11/07/23

- Forest fuels created during operational activities of this plan will be managed in accordance with the relevant forest establishment phase of this FPP.

Is there a fire management plan for this area? YES / **NO** – where is it or who has it and who is responsible for it?

Management of unplanned fires (if no fire management plan)

- Any wildfire which occurs on the property during the period of this plan will be dealt with in accordance the management specifications and practices of the Forest Industry Fire Prevention Council Guidelines, and as directed by Tasmania Fire Service.

D. CONSERVATION OF NATURAL & CULTURAL VALUES

Soils

- There is an area shown on the FPP map as “Potential Landslip Zone” this area is excluded from the Operational Area. The boundary of the Zone will be marked with BLUE flagging tape.

Watercourse management

- No specific management prescriptions required.

Water supply protection measures (domestic, town or irrigation)

- No specific management prescriptions required.

Geomorphology

- No specific management prescriptions required.

Biodiversity

Reporting new sites for threatened fauna and flora

If new sites for threatened fauna (e.g. raptor nests, devil dens etc.) or flora are found during the implementation of a forest practices plan, the sites must be reported to the Forest Practices Authority as soon as practical.

General

Snug Tiers Nature Recreation Area

		Initial	Date
FPP No:	Landowner(s) or authorised representative	MB	11/07/23
AKO0407	Applicant	DB	11/07/23
	FPO (Planning)		11/07/23

- The north-eastern boundary of the harvest area adjoins the Snug Tiers Nature Recreation Area. Care will be taken to avoid incursion into the reserve. The boundary in that section of the property will be marked with PINK and BLUE flagging tape. No machinery is to cross the boundary and no trees to be felled across the boundary.

Flora

- No specific management prescriptions required.

Fauna

Grey goshawk

- Potential habitat will be encapsulated within the Biodiversity Protection Zone along the main body of the Class 4 stream.
- If suspected nesting activity (typically a bird clearly visible or calling repeatedly in a locality) is observed or a nest is found the contractor will immediately cease FPP operations within 100m and notify a FPO who will in turn contact the FPA.

Wedge tailed eagle / White bellied sea eagle

- The clearing contractor is to remain vigilant of nests and if discovered they are to immediately cease all forestry activity and contact the a FPO who will consult with the FPA to provide advice.
 - If a nest is discovered during the management constraint period (July to January inclusive), cease all forestry activity within 500 m of the nest, or within 1 km if in line of sight of the nest.
 - If a nest is discovered outside the management constraint period (February to June inclusive), cease all forestry activities within 500 m of the nest.

Eastern quoll / Spotted tail quoll / Tasmanian devil

- Potential habitat will be maintained within the Biodiversity Protection Zone and the Potential Landslip Zone as shown on the FPP map. These areas will be demarcated with BLUE flagging tape and excluded from the Operational-Harvest Area.
- If a suspected den site is found, then operations must cease within 50 metres of the suspected site and advice sought from the FPA prior to operations continuing closer to the site.

Swiftly Parrot

- Potential nesting and/or foraging habitat is embedded within the Wildlife Habitat Clumps. The clumps will be marked with BLUE flagging tape.
- Report immediately to the FPA any evidence of a Swift parrot nesting site and/or Swift parrots being present (heard or seen) inside or within 500 metres of the FPP area during the period September to February.
- Cease operations if a Swift parrot presence is confirmed within the operational area.
- Retain large diameter hollow bearing trees >70 cm diameter at breast height wherever it is safe to do so.

		Initial	Date
FPP No:	Landowner(s) or authorised representative	<u>MB</u>	<u>11/07/23</u>
AKO0407	Applicant	<u>DB</u>	<u>11/07/23</u>
	FPO (Planning)	<u></u>	<u>11/07/23</u>

Mt Mangana stag beetle

- Potential habitat will be maintained within the Biodiversity Protection Zone and the Potential Landslip Zone as shown on the FPP map. These areas will be demarcated with BLUE flagging tape and excluded from the Operational-Harvest Area.

Masked owl

- Any large old trees (>100 cm DBH) encountered in the harvest area should be retained subject to a hazard assessment.
- If a suspected nest or roost site is located within the operational area during operations, operations should cease within 100 metres of the site and the FPA notified as soon as possible. Nests are located in large trees with large hollows/spouts, and may have evidence of use (e.g. pellets of regurgitated skin and bones; feathers; droppings) at the base of the tree (within the canopy drip zone). Roost sites can be associated with similar habitat features but may occur in understorey shrubs with dense canopies (e.g. native cherry, she-oaks, banksia etc) or rocky outcrops with overhangs, ledges and caves. Such sites may also show evidence of use.

Visual landscape

- No specific management prescriptions required.

Cultural heritage

- The proposed site does not meet any of the ten trigger statements (see Procedures For Managing Aboriginal and Cultural Heritage When Preparing Forest Practices Plans), no survey for Aboriginal cultural heritage is required.
- A Forest Practices Officer will be contacted in the event that any new cultural sites are identified. Operations will cease immediately and any cultural site located during the operation will be excluded from the operation area until the advice of the Forest Practices Authority Manager for Cultural Heritage is obtained.

Person or organisation responsible for organising Aboriginal archaeological survey (if required)

No Survey Required

E. ESTABLISHING AND MAINTAINING FORESTS

(See also section D. Conservation of Natural and Cultural Values and section F. Management of Fuels, Oils, Rubbish and Emissions.)

No prescriptions are required under Section E of this Plan

F. MANAGEMENT OF FUELS, OILS, RUBBISH AND EMISSIONS

Fuels and oil: requirements for filling machinery, storage of fuels and spill protection:

		Initial	Date
FPP No:	Landowner(s) or authorised representative	MB	11/07/23
AKO0407	Applicant	DB	11/07/23
	FPO (Planning)		11/7/23

- Care must be taken to avoid spillage when refuelling machines and vehicles, or when filling bulk storage tanks.
- Where fuels and lubricants total in excess of 1,000 L and will be stored in the same location for more than two days, they will be stored within an earthen bund or drip tray capable of containing the total volume.
- All servicing and refuelling of machinery and equipment will be completed no closer than 40 m of any watercourse. Machinery maintenance should be performed in a bunded area if there is a possibility of fuel, oil or grease being spilt.
- Equipment will be maintained so that fuel and oil leaks are minimised.
- Fuel tankers and lubricants will be bunded and will be as far as practical, and no closer than 40 m from watercourses. Bunding will take into consideration natural ground features that may assist in containing any spillage.
- ALL fuel or oil spills will be contained as soon as possible and clean up procedures will be promptly implemented where necessary.
- Fuel or oil spills that cause or threaten to cause environmental harm will be reported to Department of Primary Industries, Water and Environment (DPIPWE) by phoning 1800 005 171 as soon as practicable but within 24 hours of the event **and** to the **landowners**.

Rubbish (requirements for storage and removal of rubbish e.g. grease canisters, fuel and oil drums, pesticide drums, fertilizer bags).

- Rubbish such as oily wastes, fuel and oil drums, filters and oily rags will be regularly removed as they are generated or emptied to a collection depot suitable for receiving hazardous wastes.
- All other rubbish, e.g. wire ropes, plastic wrappings etc., will be removed regularly to a collection depot or transfer station, or recycled if appropriate.

MEMORANDUM

Pursuant to section 18(4)(b) of the *Forest Practices Act 1985*

APPROVAL TO SUBMIT FOREST PRACTICES PLAN No. AKO0407 (the Plan)

Landowners consent

I am the owner of the land or the authorised agent of the owner of the land referred to in the Plan.

I give my approval for the plan to be submitted to the Forest Practices Authority as an application for certification under section 19 of the *Forest Practices Act 1985*.

I understand that, under Division 1A of the *Private Forests Act 1994*, I may be required to pay a levy to Private Forests Tasmania based on the nett area of forest operations under the Plan.

APPLICATION FOR FOREST PRACTICES PLAN No. AKO0407 (the Plan)

Pursuant to Section 19 of the *Forest Practices Act 1985* (the Act)

Acknowledgement of applicant

I submit the Plan to the Forest Practices Authority (the Authority) and apply for its certification.

I acknowledge that the Plan has been prepared in accordance with section 18 of the Act.

I understand the provisions of the Plan, and that I am responsible for ensuring that the Plan is complied with unless otherwise stated in the Plan.

I understand that I am responsible for the lodgment of interim compliance reports with the Authority within 30 days of the completion of each discrete operational phase* authorised under the Plan; and further, for the lodgment of a final compliance report with the Authority within 30 days of the expiry of the Plan.

I understand that under sections 18(4A) and 18(4B) of the Act, I must pay a prescribed application fee at a time, and in a manner, determined by the Authority.

Pursuant to section 18(4C) of the Act, I am aware that if I fail to pay the fee according to the above terms I acknowledge that the any unpaid portion of the fee is a debt due and payable to the Authority and may be recovered by the Authority in a court of competent jurisdiction.

I acknowledge the Plan may be made available to members of the public and other government departments in accordance with the provisions of the *Right to Information Act 2009* and the Authority's Policy on Communication of Information Relating to Forest Practices Plans.

**PROPERTY IDENTIFICATION CODE (PIC)
AUTHORISATION CERTIFICATE**

MAHU1131

is allocated to the property listed below

(PID 2558315) 172 GOODWINS ROAD UPPER WOODSTOCK 7150

The PIC is a permanent property identification code for the above property only and is not transferable to another property. This will be transferred to any new owner on submitting a registration if the property is sold or leased.

- **CATTLE** on the property must use the PIC for any National Livestock Identification System (NLIS) endorsed Breeder or Post-breeder tags and/or any transaction tags to identify cattle for sale or slaughter.
- **SHEEP and farmed GOATS** on the property must use the PIC for any National Livestock Identification System (NLIS) endorsed Breeder and/or property tags that are purchased for this property.
- **PLANTS and other ANIMALS.** The PIC may need to be quoted for traceability and biosecurity reasons.
- The PIC must be quoted on NATIONAL VENDOR DECLARATION FORMS for cattle, sheep and farmed goats leaving the property for sale or slaughter.
- The PIC may need to be quoted when communicating with stock agents, buyers, processors or the Department of Natural Resources and Environment Tasmania

You don't often get email from michellebye.91@gmail.com. [Learn why this is important](#)

To whom it may concern,

We are writing to inform The Commission regarding additional information relating to our Hearing last week (rezoning at 172 Goodwins rd Upper Woodstock- RU2 to EPZ).

Since the Hearing we have;

- Registered for a PIC number, this is for our current use of the land raising cattle, sheep and an orchard commercially.
- We have had our inquiry to council answered with permission to clear our property with 30m offsets from the boundary and water ways ect.
- Have commissioned a Forest Practices Plan to comply with the relevant legislations.

This work is underway.

- Have arranged for our boundary to be surveyed as soon as necessary to ensure we stay within the guidelines

Nb. Please note our aim is to get to the 80 percent clear land required for our property, thus, being no longer eligible for rezoning to the Environmental Protection Zone.

Please keep our current use of the land and steps being undertaken in mind when making any further decisions regarding the final rezoning of 172 Goodwins rd. We would still very much be amenable to rezoning the second smaller title as EPZ if that is considered a reasonable compromise, as to leave the larger title more open to our agricultural pursuits.

Sincerely,
Dr Michelle Becker and Mr Daniel Becker

Subject: Re: Returned form, request to be heard- TUES 9th May

Hello,

My husband and I are attending a hearing (via MS Teams) tomorrow morning. I am not familiar with the platform, do I need to download anything prior? We have not received a link yet but understand this may be sent tomorrow.

Also please find attached supplementary information for our hearing for the board members should they wish to see it.

Thank you

Good Morning Michelle

Thank you for your email.
Your hearing attendance has been noted.

You will receive an email containing an MS Teams link to join the hearing on or before the morning of the hearing.

Kind regards

Subject: Returned form, request to be heard- TUES 9th May

Hello,

Please find attached our completed form for our hearing on Tuesday.

I did send it directly to a team member earlier in the week however I only realised it was meant to be sent to the TPC general email. My apologies.

We live remotely and will require an MS link before the hearing, is this correct?

Thanks so much
