Re: Submission to Circular Head Council LPS

I provide the following comments:

The primary objective of the Scenic Protection Code is to protect views of significant sites and areas of outstanding scenic beauty.

Circular Head has many areas of outstanding scenic beauty and significant sites that are iconic in the eyes of Circular Head locals, Tasmanians and visitors alike (Australian and international). This includes the Nut and whole Stanley peninsula, Marrawah to Mount Cameron; and the offshore islands (including Walker, Robbins and Three Hummocks).

There should be triggers and mechanisms in place to protect these areas and sites for the amenity of all viewers in the future.

The Scenic Protection Code overlay should include all the above-mentioned areas; and views thereof.

Yours Faithfully,
Audrey Critchlow
