**Subject:** Project Land

To The Development Assessment Panel,

My name is Deborah Norris & I live at 1 Wallace Street Bridgewater.

I am writing to you because I have been using a portion of land next to my house which now is Project Land.

I have been running horses on the land for 20 years & I know people before me were running horses on the land as well.

I have only 1 horse left now & at the moment he is running at my parents place because I'm not well, but he can't stay there for ever as my parents are 82 & 92 years old.

I have always looked after that piece of land, I have kept it clean & tidy. The swans come up through the block to have a feed around the railways the horse doesn't bother them, they have nested by the river there a few times so they must know it's safe.

I always thought a Utility Easement runs down that piece of land so nothing can be built on it, maybe I was wrong.

I don't think I am asking for too much just that little bit of land for the horse to run on, he is now 20 years old.

So if you can consider this representation I would be very appreciative.

Kind Regards,  
Deborah Norris
